5. In July 2012 a draft Site Implementation Agreement ordinance amending the County Regulatory Code was provided to you for your review. Since that time staff has edited and further amended the ordinance in response to comments and further discussions with stakeholders. Although the aforementioned changes are not significant when compared to the prior version, a considerable amount of time has elapsed since this ordinance was last put out for public review. Therefore, PDS would like to provide another opportunity for additional review and comment of the attached ordinance.

The proposed ordinance introduces a new framework for a Site Implementation Agreement (SIA). The SIA would serve the function of a companion permit, in most instances, for subdivision maps. The SIA would assist in assuring the implementation of project requirements (i.e. conditions) associated with the development of subdivisions, mitigation of identified impacts, and on-going requirements after map recordation.

Condition satisfaction is a challenging process for developments that are seeking entitlements. For starters, project mitigation conditions are currently found in multiple, unrelated documents --- this disjointed approach to project conditioning is difficult to follow for applicants, community members and staff. The SIA would serve as a valuable tool that introduces a simple and flexible option in determining how and when conditions are met. Our current system does not easily allow for this flexibility.

The draft ordinance is being sent out for a 30-day public review period. Comments on this proposed amendment are requested by April 22, 2013. A hearing before the Board of Supervisors is expected this summer. Please send your comments or questions to Joseph Farace at (858) 694-3690 or by e-mail at joseph.farace@sdcounty.ca.gov.
